BE HEROIC.

Dear „Heroes and Heroines“,

We have made it our mission to ensure that our products combine safety, comfort and fit in a durable and cost-conscious way. That's how it was, that's how it is and that's how it will stay.

The workbook for the 2025 collection includes new editions of popular classics such as the HAKUNA MATATA (➤026) textile combination in and the AYANA (➤016) leather one-piece in their third generations and several glove and boot models. The range is complemented by new developments such as the waterproof TAMARACK adventure combination, made from the innovative 2.5-layer ripstop laminate.

All future clothing items will be equipped with **D30® protectors**. In addition, a **new injected knuckle cap** has been designed, which is used in the SEPANG (➤096) and GAVIA 2in1 (➤107) models. It is lined with **aramid stretch** to make it even lighter and more flexible while maintaining the same level of protection.

New Sympatex® membranes are used for waterproof products.

The 2025 collection has been significantly slimmed down, we have opted for fewer models, but more depth in the colors and sizes.

Note on using the workbook:

In order to make the subdivision of the workbook even more user-oriented, we are no longer subdividing the **garments** into leather and textile. Instead, we are focusing on a division according to application areas and biker types.

Since the 2023 edition, you can use the **QR codes** next to the products to obtain further information and use your **Webfashion** access to call up helpful tutorials, videos and product photos as well as detailed explanations of technologies and materials.

Orders can also be processed quickly and easily. This is how we optimally combine the traditional printed workbook with the digital B2B portal.

We would ask you to place your orders for 2025 early again this year. This is the only way we can ensure that the items are ready for sale on time.

We hope you enjoy the Held 2025 collection.

Your Held team
